Final Project Theory

Q1 What is Data Analysis

→ Data analysis is the process of ~~cleaning~~ collecting cleaning and analysis data to find useful insights and support decision making

Q2 How to plan a Data Science Project

→ Define problem, Collect data, Clean, & preprocess data, perform ~~analysis~~ analysis & modeling, evaluate results, Deploy or present findings

Q3 How to frame a machine learning problem?

→ What to predict identify first, Define input features, Decide problem type, Choose evaluation metric

Q4 What are Tensors

→ Tensors are multi-dimensional arrays

- 0D - Scalar
- 1D - Vector
- 2D - Matrix
- ~~3~~ 3D - Tensor
